

DEVELOPING A COVIDSAFE PLAN FOR CHURCH PREMISES

15 May 2020

Anglican Diocese of Grafton

Following this plan will enable your church to comply with both the government and diocesan requirements, and will enable you to stay flexible to the changing environment.

PREPARE AND PREVENT

1. **When preparing to re-open church buildings, the local leadership (Rector and Churchwardens or PC Executive) needs to meet and agree:**
 - 1.1 A local **church plan** specific to your church, *which includes the number of people that can be accommodated in each of your buildings while observing the 4m² per person rule, a strategy for people to book in / register their intention to attend a service or event and for the recording of contact details*
 - 1.2 Nominated **COVIDSafe Responsible Persons / COVIDSafe Warden**
 - 1.3 A **cleaning plan**
 - 1.4 Develop a plan for what you are going to do should someone in your leadership team or congregation is **diagnosed** with COVID19 (see below)
 - 1.5 A regular **review** of the situation to monitor your management strategy
 - 1.6 How to **communicate** your plans with the rest of the leadership team (e.g., youth leaders, LLMs, clergy, musicians, small groups), the congregation, the public
 - 1.7 How you will encourage the members of your community to download and use the COVIDSafe App
 - 1.8 How you will **document** your decision making

2. **Once services are authorized to recommence, before the church service, ensure:**
 - 2.1 Pre-service **cleaning** is complete
 - 2.2 Your **COVIDSafe Posters** are displayed prominently at the entrance and in key locations
 - 2.3 Your **COVIDSafe Warden** is easily identifiable
 - 2.4 Because attendee numbers are limited, people need to **register** their intention to attend by phoning in or using a booking App
 - 2.5 Your greeting/welcoming volunteers are aware of the Safe Work screening tips
 - 2.6 The **attendee register** is set up.
 - 2.7 Appropriate **hand sanitation** is set up in a prominent location

2.8 A **seating plan** is established at 1.5 meters apart (4m² per person), or adequate plans are in place to ensure social distancing such as 1 family per pew/row, or 2 spare seats between each family group. This will require the rearrangement of seats or that certain pews be cordoned off.

3. **During the service, ensure:**

3.1 When people arrive, they should wait in a line at least 1.5 metres apart if there is a queue.

3.2 On entry, all attendees are asked if they have experienced any COVID or flu like symptoms in the past two weeks. If yes, they should be informed that they will be unable to attend unless cleared by doctors. If OK, then invited to complete the attendee register (where required).

3.3 Limit the use of hymn books and printed materials. Where possible use projection for worship, prayer and order of service.

3.4 During the service, announcements should include updates on COVIDSafe practices, including as a minimum:

- People should practice social distancing at a minimum of 1.5 meters at all times
- No physical greetings or exchanges such as handshakes or hugs, including sharing of the Peace. Learning to Sign “peace be with you” is highly recommended.
- Wash hands and maintain good hygiene practices
- Sneezing into your elbow
- Other relevant COVID Safe practices that apply to the local congregation

3.5 Your COVID Safe Warden is monitoring attendee numbers to ensure maximums are not exceeded.

3.6 There is a clear post-service plan to monitor and enforce social distancing practices including at Morning Tea, in the carpark, conversations etc.

[Communion \(once authorized by the Bishop to recommence\)](#)

General Synod has provided the following guidelines with respect of Communion:

- Design arrangements for people to receive communion which restrict proximity to each other and the need to touch surfaces
- Ensure ministers of the Eucharist practice wash their hands/ use sanitizer before and after distributing communion
- Offer Communion in one kind only to all communicants i.e. the consecrated bread/wafer/host.
- Wafers should not be placed in mouths – then wash/sanitize hands immediately before and after
- Intinction is not recommended

4. After the service, ensure:

- 4.1 The [attendee register](#) is stored in an easy to locate place
- 4.2 [Post service cleaning](#) is complete
- 4.3 The [Monitoring plan](#) is followed

Cleaning Protocols:

- Wear gloves when cleaning and discard after each use
- Thoroughly clean surfaces using detergent and water.
- Only use a disinfectant after cleaning with the detergent and water
- Leave disinfectant on the surface for at least 10 minutes before cleaning off
- If someone infected has been at your venue, follow the national protocols of cleaning

INCIDENT RESPONSE AND RECOVERY

If anyone in your church, whether it is staff, volunteer or congregant suspects that someone may have the virus, or has been exposed to it, it is important that they notify the **COVIDSafe Warden** immediately. In conjunction with other leaders, they will be responsible for overseeing the ministry unit's response.

The management of this scenario will be much easier if everyone has been encouraged to download and use the COVIDSafe APP

On the following page is the Safe Work Australia information sheet. It is important to understand that where you have staff or volunteers at a location in Australia, it is classified under Health & Safety laws as a workplace.

Therefore, the process for a COVID incident notification is:

1. Notify the COVIDSafe Warden on duty immediately
2. Secure the site as outlined on the Safe Work Australia information sheet process
3. Notify the Diocese immediately and complete the normal incident reporting process
4. Work with the Diocese on the appropriate government notification

COVID-19 at the workplace

You are not expected, and should not try, to diagnose people. However, you have a work health and safety duty to minimise the risk of workers and others in the workplace being exposed to COVID-19, so far as reasonably practicable.

If you reasonably suspect someone could have the virus, or has been exposed, this creates a health risk at your workplace, and you will need to follow the steps below.

The person you are concerned about is at the workplace

1. ISOLATE

Prevent the spread. Isolate the person from others and provide a disposable surgical mask, if available, for the person to wear.

2. SEEK ADVICE

Call your state or territory helpline. Follow advice of public health officials.

3. TRANSPORT

Ensure the person has transport to their home or to a medical facility.

4. CLEAN

Clean and disinfect the areas where the person and close contacts have been. Do not use those areas until this process is complete. Use PPE when cleaning.

5. IDENTIFY & INFORM

Consider who the person has had close contact with. If instructed by public health officials, tell close contacts they may have been exposed and follow advice on quarantine requirements.

6. REVIEW

Review risk management controls relating to COVID-19 and review whether work may need to change. Consult workers on WHS issues.

The person you are concerned about was recently at the workplace

1. SEEK ADVICE

Call your state or territory helpline. Follow advice of public health officials.

2. IDENTIFY & INFORM

Identify who at the workplace had close contact with the affected person. If instructed by public health officials, tell close contacts they may have been exposed and follow advice on quarantine requirements.

3. CLEAN

Clean and disinfect the areas where the person and their close contacts have been. Do not use those areas until this process is complete. Use PPE when cleaning.

4. REVIEW

Review risk management controls relating to COVID-19 and review whether work may need to change. Consult workers on WHS issues.

If anything is unclear, see detailed guidance on the Safe Work Australia Website

Remember:

- > There is not an automatic WHS requirement to close down an entire workplace, particularly if the person infected, or suspected to be infected, has only visited parts of the workplace.
- > Workers assisting a potentially infectious person should have appropriate PPE and follow hand hygiene procedures.
- > Consult with workers and allow them to raise concerns.
- > Do you need to notify your [WHS regulator](#)? See our [Incident Notification fact sheet](#).
- > Comply with privacy obligations. See [guidance from the OAIC](#).
- > Follow the advice of health officials at all times.
